

SCALE X PRO MISTING FILTERS

SCALE X PRO WATER MISTING FILTER

STARTING AT \$119

PURE PERFORMANCE, LASTING PROTECTION

WATER MISTING FILTERS

Experience the numerous benefits of Scale X Pro water misting filters, designed to optimize the functionality of your misting system. By effectively removing chlorine and ammonia, these filters prevent the rapid deterioration of rubber o-rings, ensuring a longer lifespan and consistent performance of your system.

With advanced scale protection, Scale X Pro filters prevent nozzle clogs, maintaining a steady and efficient mist. The reduction of scale and corrosion also safeguards the internal components of the pump, leading to extended pump life and reduced downtime caused by water-related issues.

Moreover, high levels of scale in water can cause unsightly buildup on surrounding surfaces. Scale X Pro filters treat hard water, preventing it from forming hard scale on solid surfaces. This ensures your misting system operates smoothly and keeps your environment clean and attractive.

FEATURES & BENEFITS

- Chlorine removal
- Ammonia removal
- Slow o-ring deterioration
- Longer pump life
- Keeps surrounding area clean
