

STAINLESS STEEL MIST LINE

PREMIUM STAINLESS STEEL TUBING
STARTING AT \$32

UNMATCHED DURABILITY & PERFORMANCE

MIST LINES FOR SUPERIOR COOLING

Aeromist Stainless Mist Line is a premium-grade solution designed to provide seamless misting capabilities for various applications. With its convenient 8 ft. length and 3/8" outer diameter (OD), this mist line offers a versatile option for misting systems.

Made from high-quality stainless steel, the mist line exhibits excellent resistance to heat, chemicals, and extreme weather conditions. This ensures its longevity and reliable functionality, making it suitable for a wide range of misting applications. Whether you need to cool outdoor spaces, enhance agricultural operations, or create a refreshing environment in commercial settings, the Aeromist Stainless Mist Line is a dependable choice.

To enhance its visual appeal and seamlessly integrate it into your misting system, the mist line is available in various powder-coated colors. This allows you to match the mist line with your existing structures, ensuring a cohesive and visually pleasing setup.

FEATURES & BENEFITS

-  Multiple finishes available
-  8 ft length | 3/8" diameter
-  Durable performance
-  Outdoor-rated
-  Designed for high pressure

INSTALLATION INSTRUCTIONS

The installation of misting line is a straightforward process, designed for efficiency and reliability, ensuring a seamless and secure assembly within your system.

HOW TO INSTALL STAINLESS LINES

- 1 Plan the Layout:** Begin by measuring the area where the misting system will be installed. Calculate the required length of stainless tubing to ensure optimal coverage, considering the proximity to the water source and power supply.
- 2 Connect Tubing to Pump:** Attach the stainless blank line to the Nylon tubing. Ensure the connection is tight and leak-proof to maintain efficient system pressure.
- 3 Install the Supply Line:** Connect the stainless blank to the stainless mist line.
- 4 Connect Nozzles:** Connect the selection of nozzles to the stainless mist line after mounting the line to the desired location.
